Please find attached a submission dated Dec 31-09 in response to developments and correspondence.

For reasons given in this submission, Friends of Davie Bay request:

- 1 Minister Penner declare the Texada South Quarry as a Reviewable Project
- 2 That a full karst assessment be authorized by the BC Government so that the feature of the karst can be understood and mitigation strategies developed
- 3 That the DFO find that the barge loadout facility and quarrying activity will cause a HADD in the rockfish conservation area of Davie Bay, and consequently must conduct an assessment under the Canadian Environmental Assessment

The attachments form part of the submission

We look forward to your response

Your truly,

Richard Fletcher
Friends of Davie Bay
